3-KAM®

REF 30700

REF 30701

- Tracheal compresses are used to absorb tracheal secretions and to cushion the tracheal cannula shield against the skin
- The three-chamber tracheal compress is suitable for particularly high secretion production
- It consists of three compresses of different thicknesses fixed on top of each other, in which different non-woven materials have been used
- The front layer is moisture-repellent and can be wiped clean without lint formation
- The back of the compress is particularly soft, highly absorbent and keeps the skin dry and warm. This prevents a moist chamber from forming between the compress and the skin
- The **3-KAM® SLIT** (with slit) is used to quickly change the compress when the tracheostomy tube is in place
- The compresses are intended for single use only

SCOPE OF DELIVERY

3-KAM® **REF 30700**
10 x tracheal compresses

3-KAM® SLIT **REF 30701**
10 x tracheal compresses, with slit

Product	Size	Unit	REF
3-KAM®	10 x 14 cm	10	**30700**
3-KAM® SLIT	10 x 14 cm	10	**30701**
